RUMANIAN FIREWOOD PROCUREMENT CAMPAIGN

Summary: A campaign conducted in Rumania during the fall of 1952 was the firewood procurement campaign, beginning in mid-September, which aimed at the collection and storing of large quantities of firewood for the coming winter. Quota fulfillment varied throughout the regiunes of the country, according to the degree of assistance rendered by the regiune party committees.

A major fall campaign in Rumania is the collection and transport of all available firewood. Those regiunes which had received active support from their committees were the ones showing the most favorable progress. Thus, the Pitesti, Timisoara, and Galati regiunes, appearing in white on the accompanying map, are leading with a record of 80 - 100 percent completed quota. Cluj, Hunedoara, Craiova, and Baia-Mare regiunes and Hungarian Autonomous Regiune have completed only 60 - 80 percent of the plan, whereas Oradea, Arad, Stalin, and Suceava regiunes completed only 40 - 60 percent of the plan.

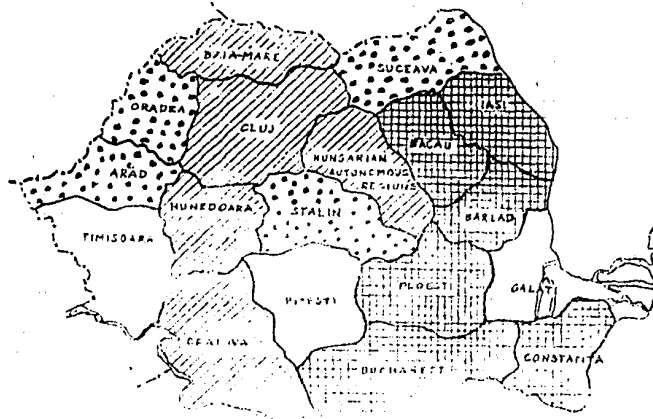

The regiunes showing the worst results are Bacau, Iasi, Barlad, Constanta, Bucharest, and Ploesti, where the amount of firewood collected and transported is less than 40 percent of the quota. The regiune party committees are strongly urged to take definite measures in aiding and controlling the activities of the local people's councils, so that all campaign quotas may be met.
